

Nipple Drinking Technology

for Rearing and Layer Production

FeatherSoft Layer Nipple.

The layer nipple that delivers.

Features and Benefits.

- **360° triggering** - Easy triggering of the pin provides a plentiful supply of water to birds of all ages.
- **Ideal Flow** - The ideal water flow of the nipple results in optimum performance at every age and improved litter conditions.
- **One Nipple from Start to Finish** - Birds are raised on the same nipple that they will use for egg production.
- **Adaptable to all cage designs** - The FeatherSoft Layer Nipple System is adaptable to Belt-Battery and A-Frame style cages for brood/grow and egg production.
- **Trouble-free performance** - Layer Nipples have only 3 parts: body, metering pin and triggering pin. Lubing Layer Nipples **DO NOT** include O-rings, seals or steel balls.
- **Raised water entry point** - The nipple's raised water entry point inside the water pipe eliminates the possibility of sediments from entering the nipple assembly.
- **20 micron test**- Unlike competitors' systems, Lubing Nipples reduce risk of blocking water flow by allowing particles up to 20 microns to pass through nipples.

Lubing's patented 360° **FeatherSoft™ Layer Nipple delivers** performance and results that will make a difference on your bottom line.

Lubing has established a strong position in the market place by offering innovative products that surpass all others. **Did you know that more than 1 billion birds around the world drink from a Lubing system on a daily basis?**

Got Lubing? For additional information about our cutting-edge poultry products please call us at **423 709.1000**, use our toll-free fax line **866 289.3237**, write to info@lubingusa.com or visit our website at www.lubingusa.com.
